

Axtell Cattle Company

Red Angus Bull Sale

Thursday, March 31, 2011

1:30 p.m.

High Plains Livestock Exchange - Brush, CO

Sale Information

Thursday, March 31st
1:30 p.m.
High Plains Livestock, Brush

Sale Day Phone Numbers:
High Plains Livestock Exchange - 970.842.5115
Brian Axtell Cell - 970.554.1132
Jamie Axtell Cell - 970.554.1680

GENERAL INFORMATION:

Inspection of Cattle: All bulls can be viewed at the ranch southwest of Anton. Please call to set up an appointment and obtain directions. All sale animals will be available for preview at the sale location on March 30th.

Health: Health papers can be furnished for cattle to be shipped out of state. All bulls are tested negative for BVD and have passed a fertility test.

Delivery: Bulls will be delivered free up to 250 miles. Other arrangements can be made on an individual basis, please call prior to sale.

Possession: Bulls can be taken after purchase or we will care for the bulls until April 15th, free of charge.

Guarantee: All bulls have passed fertility tests. All bulls will be guaranteed sound for the first breeding season (until Sept 1, 2011); however, the seller will not be held responsible for mistreatment or mismanagement. If a suitable replacement is available he will be furnished—OR—a credit toward a purchase in next years sale if a suitable replacement is not available.

Additional Data: Additional data on all bulls will be available on sale day including scrotal circumference and carcass ultrasound data.

Sale Order: Cattle WILL sell in catalog order

Semen Interest: Axtell Cattle Co. is retaining a 1/3 revenue sharing semen interest in all bulls selling. Buyer will retain all salvage value of bull.

Absentee Bidding:

Anyone wishing to bid who cannot attend the sale may place bids by contacting Brian Axtell or the sale managers listed below. Internet bidding is also available through www.cattleusa.com.

Auctioneers/Sale Management:

Premier Livestock Sale Management, Mat Lewis: 970-521-0545

Representatives:

Red Angus Association, Myron Edelman: 307-351-6032

WELCOME!

We would like to welcome you to the third Axtell Cattle Company Red Angus Bull Sale.

The bulls are being developed at our home south of Anton. They have been hand fed so they are calm natured and used to people. They have received a ration that is free choice millet hay along with a roasted 12% protein grain ration from Colorado Soy. They receive approximately 0.75% of their body weight in the form of grain. We feel that this ration will allow the bulls to grow adequately and should help them down the road in terms of longevity and soundness by not pushing them to the point of being over-conditioned.

We invite you to stop by to see the bulls and their mothers. Just call to set up an appointment and obtain directions. The bulls will also be available at the sale location on March 30th for preview.

We look forward to seeing you on sale day but if you are unable to attend and wish to bid on a bull you can contact us, the sale management or register a couple days prior to the sale at www.cattleusa.com.

Please let us know if we can be of any assistance to you in the bull buying process. We love to talk cattle and would be glad to visit with you anytime about the bulls or our genetics program. See you March 31st!

-The Axtell Family
Brian, Jamie Jo and Clay

Featured Dams

AX LANA 205
Dam of Lot 6

*She is a small cow with a great udder that always does a good job for us.
She is the dam of reference sire—Axtell Pay Day 8205*

LCHMN SYRINGA 1080

*Lots 22, 23, 35 and 36 go back to this great cow
She was in the herd until 14 years of age. She had the best feet and udder
of any cow we've had. She was our original Red Angus cow.*

AX Lana 02-616
Dam of Lot 8

One of our favorite cows out of the productive Lana cow family.

BJR BONNEBELL 24G and AXTELL BONNEBELL 24G-826
*She is the dam to BJR HIGH VOLTAGE 924, a high selling bull for
BootJack. She is very deep bodied and adds loads of muscle.
She is the dam of Lot 31.*

Cody has impressed us with moderate birth weights and excellent performance. His calves are thick, long and moderate.

There are not many bulls that combine this low of a birth weight with the amount of performance that Cody gives.

He is a very easy going bull as well.

Gambler has produced fantastic daughters for us. His daughters have perfect udders and are feminine cows. His legacy lives on through his daughters and son Gunslinger 801. Semen is available.

Our Program

We purchased our first Registered Red Angus cow in 1993 and started in the Red Angus business in 1997. We started small with purchases from well known herds **and over the years we've been able to increase our herd** through additional purchases at Boot Jack, Lonker Red Angus, Milk Creek Reds, Beckton and others. All of the cattle we have bought in the last five years have went back to a base of Boot Jack and Beckton genetics. We have used A.I.; however, our bread and butter has been buying the best bulls we can find and using them in natural service. We are also using more home raised sires in our program. We feel that our herd bulls are as good or better than most A.I. bulls in the industry. Using our home raised bulls is something that has really helped us improve our cow herd. We take a lot of pride in udder quality and mothering ability and knowing the dam of our **herd sire is important to us so that we don't bring in any** unwanted traits through the cow side.

Our program is focused on convenience traits. We strive for a cow herd that has sound feet, excellent udders and good fleshing ability. We live in short grass country where large pampered cattle will not work. We have found that moderate framed, easy doing cattle are the way to go here. Excessive growth EPD cattle are typically gone very quickly due to our limited resources. We **breed for the middle and feel that if our EPD's indicate** that we are near the breed average in most traits, then we are doing something right. You will not see many sires used here that are trait leaders at any one trait, yet they will be very competitive at most traits.

You will notice a strong Boot Jack influence in our herd. We really like the maternal side of the Boot Jack cattle and it is our desire to have a linebred herd of Boot Jack influenced cows. The Boot Jack herd was considered **one of the best herds in it's time and we plan on recreating** that great herd with a few twists of our own. We recently acquired the majority of the available BJR semen and will be implementing those genetics into our herd more in the future. A portion of the Boot Jack Ranch semen is available for sale.

The dam's and most of the sires of these bulls are available to be seen at any time. Calving ease is also a focus of our program. We have had very few calving problems in our Red Angus herd.

For more information on our program, please don't hesitate to contact us or check out our website at www.axtellcattlecompany.com.

0533 is a massive bull. Very wide based and full of meat. He was a standout from birth until sale day. His dam is the grand dam of ABS sire Mlk Crk Redstone. If you want to add performance to your herd, this is the bull. He has a great disposition too!

Lot 2 stacks a bunch of good cows in his pedigree. He is a well muscled bull that is very sound. His dam was our pick of cows at Drga in Montana and does nothing wrong- moderate, nice udder and always brings in a good calf. I think this bull is one of the more complete bulls in the offering. He may not be the #1 bull at any trail, but he is very close to the top in all the traits.

0660 is wide based and loaded with muscle. In my mind, he is hard to fault. Very long and a great top. He has good feet and is backed by a nice Giuliani daughter. His full sister just calved and is an excellent mother with a great udder. This bull could help out most commercial or registered breeders.

This bull has really performed on test. He is deep and thick and is the perfect heifer bull. His dam was 11 years old when he was weaned. She had a perfect udder and was an excellent cow for us. The Lana cows are **hard to beat here. This bull likely has more performance than his EPD's** indicate, while maintaining the calving ease. You will not find many -7 BW bulls that ratio 124 for ADG. One of the top bulls to sell.

Very similar pedigree to Lot 6. His dam is another top Lana cow that packs a little more performance and frame. This deep red bull is very eye appealing and deep bodied. One of our top bulls at weaning and yearling. Lanny and Connie Payne got his full brother in last year's sale.

Our son Clay is proudly wearing his "bull hat" that he received from Beckton Red Angus at their sale this past April.

Here is a bull that can work on heifers or cows. He is moderate in frame and has a lot of muscle. He goes back to the famous Copperlass cow family from Paul Haugen. He blends performance, maternal and calving ease into one nice package. He was one of the highest gaining bulls on test.

The first Dominor to sell. Our Dominor bull is a maternal brother to Nebula P707, who has become very popular. This calf reminds me of OCC cattle in the Black Angus. Very moderate, very deep and a lot of muscle. He will work on heifers. If you need a bull to reduce frame size and add substance, he is the one.

This bull is packed with muscle and has excellent feet. He has a wide top and gained well. He is very moderate in frame and has an excellent hind quarter. He should produce excellent feeder cattle! I would err on the side of caution and use him on cows at least for the first year.

024 is out of a 13 year old former donor cow that produced a \$10,000 bull in BJR High Voltage. The cow did a good job with him for her age and he has picked up on test. He is a sleeper, he has the genetics to make nice cows. His dam is as deep bodied of a cow as I've seen. He has a lot of the older proven genetics with Rambler, Logan, Red Lightning and Rambo. Good little bull!

His dam has a picture perfect udder, which is typical of the Gambler daughters. 0304 will work well on heifers and to produce females. His dam is very moderate framed. Lanny and Connie Payne have purchased two maternal brothers to this bull. They are long time customers that always pick the good ones.

Heifer bull supreme out of a small first calf heifer. His dam has old Beckton genetics in Nomad. Good carcass genetics and some thickness. Real moderate framed bull that should be easy fleshing.

Special Thanks to our 2010 Customers!
